(54) Title: **IMPROVED PRESENTATION OF LARGE OBJECTS ON SMALL DISPLAYS**

(57) Abstract: This invention relates to method for presenting at least a part of an object, comprising at least partially dividing at least one object into a plurality of sub-objects, presenting said plurality of sub-objects in a first representation, making at least one sub-object of said plurality of sub-objects an active sub-object, and in response to a user operation on said at least one active sub-object, presenting at least one of said at least one active sub-objects in a second representation. Said at least one object may be a 2D object, e.g. a Hyper-text Markup Language HTML page or a page of a text document, or a 3D object, e.g. a Virtual Reality Markup Language VRML object, and said display may be integrated in a portable electronic device. The invention further relates to a device, a system, a computer program and a computer program product.
